

Next-Generation Navigation & Unrivaled Durability

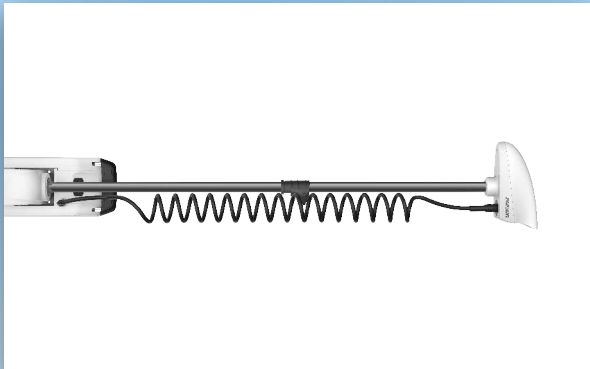

PARSUN TM120B Trolling Motor

FEATURES

- **Precision Steering:** Synchronized angular rotation and precision gears for responsive, smooth handling.
- **Smart GPS Navigation:** Advanced GPS for auto-positioning, path recording, and effortless cruising.
- **Tangle-Free Design:** Integrated sensors and "Dual-Guard" protection prevent coiled power cable tangling and tearing.
- **Indestructible Shaft:** High-strength, corrosion-proof composite main shaft—built to last and backed by a Lifetime Warranty.
- **Silent Powerhouse:** High-thrust performance with whisper-quiet operation to keep your fishing peaceful.
- **Dual Control Modes:** Supports both wireless remote and foot pedal—switch easily to suit your operating style.

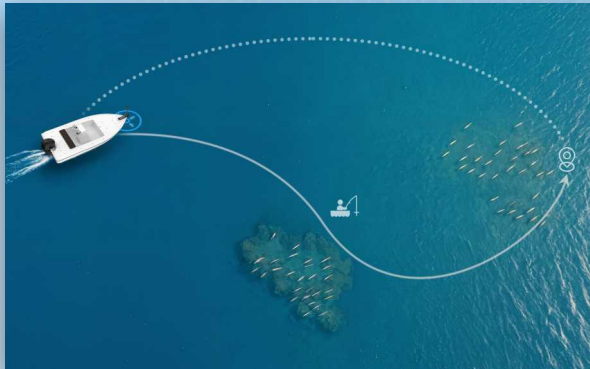

ADVANTAGES

Reinforced Composite Main Shaft

Engineered from fracture-resistant composite materials and treated with a specialized reinforcement process, our core shaft offers extreme durability. We are so confident in its strength that we provide a Lifetime Warranty.

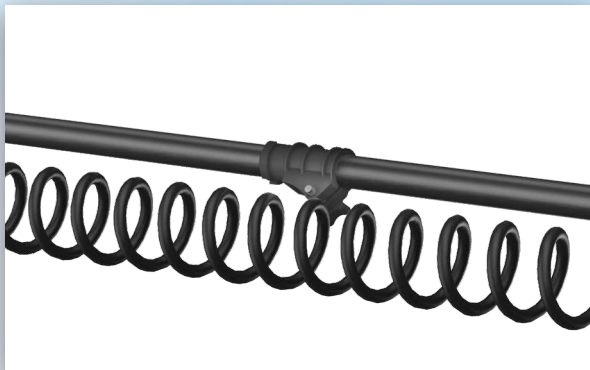

High-Precision GPS Cruise System

Master your environment with advanced features including Anchor Lock (Spot-Lock), path recording, and precise speed/heading adjustments. Manage everything via a one-touch wireless remote for true hands-free efficiency.

Versatile Control Modes

Choose between a wireless remote or an ergonomic foot pedal to match your personal preference and operational scenarios.

Smart Anti-Tangle Technology

Integrating synchronized gears, Hall magnetic encoders, and IMU sensors, this system automatically manages the coiled power cable. It actively prevents twisting and binding, ensuring smooth 360-degree rotation.

SPECIFICATIONS

Rated Voltage Of Motor (VDC)	Maximum Current Of Motor(A)	Thrust(lbs)	Control Mode
12/24	50	55/90	Remote control/foot pedal
Power(W)	Axis Length(in)	Installation Method	Waters
600/1200	50/65/75/85	bow	Freshwater/seawater
